## ZEX™ 2005-Current Ford V6 Mustang Nitrous System

**Specially designed wet nitrous system delivers 55 to 100 additional horsepower for V6 powered Mustangs**

The new model Mustang has created unprecedented excitement among performance enthusiasts. With a strong factory rated 4.0L V6 putting out a solid 210 hp, it's the perfect candidate for a nice shot of nitrous.

Once again, ZEX™ is at the forefront of nitrous technology by developing a direct-fit wet nitrous system, made specifically for the new generation V6 Ford Mustangs. Every hose, wire and even a custom machined billet fuel rail adapter have been engineered and manufactured for a perfect fit on these Mustangs. You simply won't find a safer, more powerful or easy-to-install nitrous system on the market.

In addition to the Mustang-specific components, the ZEX™ nitrous system also incorporates the most technically advanced performance features available, including the patented ZEX™ Active Fuel Control™. This innovative performance and safety feature automatically adjusts the nitrous fuel enrichment so your engine never runs too rich or too lean. The ZEX™ nitrous system also features a patented electronic TPS switch for perfect system activation at wide-open throttle, perfect for the new Mustang's throttle-by-wire technology. Power settings are fully adjustable from 55-100 horsepower with the included tuning jets.

For more information about the ZEX™ 2005-Current, V6 Mustang Nitrous System or any other ZEX™ product, call us at 1-888-817-1008, or visit us online at [www.zex.com](http://www.zex.com).

### Quick Summary

**Product:** ZEX™ 2005-Current, Ford V6 Mustang Nitrous System

**Part Number:** #82307

#### Features & Benefits:

- Nitrous system designed specifically for plug and play installation in 2005-Current 4.0L V6 Mustangs
- ZEX™ Active Fuel Control™ adjusts fuel enrichment with variations in bottle pressure; you're never too rich or too lean
- Patented TPS sensor activates nitrous only at wide open throttle; perfect for the Mustang's throttle-by-wire technology
- Adjustable from 55 to 100 hp
